

Make Your Own Metaphor!

Object or idea that you want to describe ("target")	An object or idea that you can compare your "target" to.
How does the metaphor fit?	How does the metaphor not fit?

Example:

<i>Plant</i>	<i>Factory</i>
<i>This metaphor fits because plants and factories make products.</i>	<i>This metaphor doesn't fit because when people want factories to produce more, they might be able to expand the factory or add workers. If you want a plant to grow more, you can't do that. Also, plants add oxygen that we need to the atmosphere. Factories can add pollution—stuff that is harmful—to the atmosphere.</i>
